

Parts Manual

# Variable Displacement Pump

## H1P 69 and 78cc

**Revision history**

*Table of revisions*

<b>Date</b>	<b>Changed</b>	<b>Rev</b>
May 2020	Changed document number from 'AX00000026' to 'AX152886483258' and updated CCO part numbers	0812
January 2020	Updated control gasket part numbers	0710
August 2019	Corrected end cap item numbers	0709
June 2019	Updated part numbers; added new options	0708
February 2019	Added various new options	0707
November 2018	Added control options T6, T7, T8 and T9	0706
September 2018	Added control options H2 and H3	0705
May 2018	Added new orifice option and control option	0704
April 2018	Added control options H6, H7, H8 and H9	0703
February 2018	Updated to Engineering Tomorrow format	0702

## General information

### Service Parts Identification

The following information and procedure is used to identify the module group, item number, manufacture date, part number, and part name of the parts included in the .

The parts listed include all parts which may be used when performing either "Minor Repairs", "Major Repairs" or "Conversions" on the .

### Nameplate

Each unit will have a nameplate affixed to the housing. The nameplate will include the following information:

#### Model Code

The Danfoss model code completely defines the specific unit and must be used when ordering parts to service this product.

#### Model Number

The Danfoss model number is used by the factory in manufacturing. On repeat orders, a complete unit can be ordered by the model number.

#### Serial Number

The Danfoss serial number is used to identify the manufacture date and the unit sequence in the build. The serial number is also used to identify the units warranty time period.

The letter code indicates the location of original manufacture (assembly).

The first number (2 digits) indicates the year of manufacture. The second number (2 digits) indicates the calendar week of manufacture.

The third number (5 digits) is a sequential number used to identify a specific unit.

## General information

### Date code

The date code is defined as the year and week of manufacture. The same item number may list more than one part number. This indicates that there is more than one configuration for that item number. You will see that there are different date codes for the different part numbers. Find the date code of your unit from the nameplate to determine which service part number you need to order.

*Example: The service part desired is item G30*

Order Code	Item	Date Begin	Date End	Part Number	Part Name	Qty. per Model/Kit
80	G30	89-17		8000243	End cap gasket	1
	G30		89-16	8000151	End cap gasket (SB-1995-006)	1

All units using this order code with a date code prior to 89-17 must use part number "8000151." All units with a date code of 89-17 and newer must use part number "8000243."

### About service bulletins

A Service Bulletin Number (SB-\_\_\_\_ - \_\_\_\_ ) may follow the "Part Name" of the part you desire. You must read that Service Bulletin prior to ordering that part. The information contained in these Service Bulletins, as of the print date of this bulletin, are included at the end of this manual. Service Bulletins contain more detailed information such as interchangeability, what additional parts are involved, etc. It is suggested that you add additional Service Bulletins to this manual as you receive them.

## General information

### Procedure to identify a part

The modular design of this product results in a simplified service parts list and part number identification procedure.

The same item numbers are used for same part names on all units within a product type. A part number that has another number following it in parentheses is done to make this a world wide manual.

### Regional part numbers

Some part numbers are region specific and should be ordered accordingly.

As an example, the part number (example: 314583 (9008000-0118)) will be used. The first number is sold in Germany. The number in parentheses is sold in the United States. Customers would order 9008000-0118 if ordering the part in the United States.

### Example of a part identification (H1P 69/78)

The nameplate on an H1 pump has an order code of H1P78L A A A2 C2 N F5 H G1 H6 L 33 L 33 C P 28 NN C07 NNN. Use the following procedures to determine the part number of the drive shaft used on this pump.

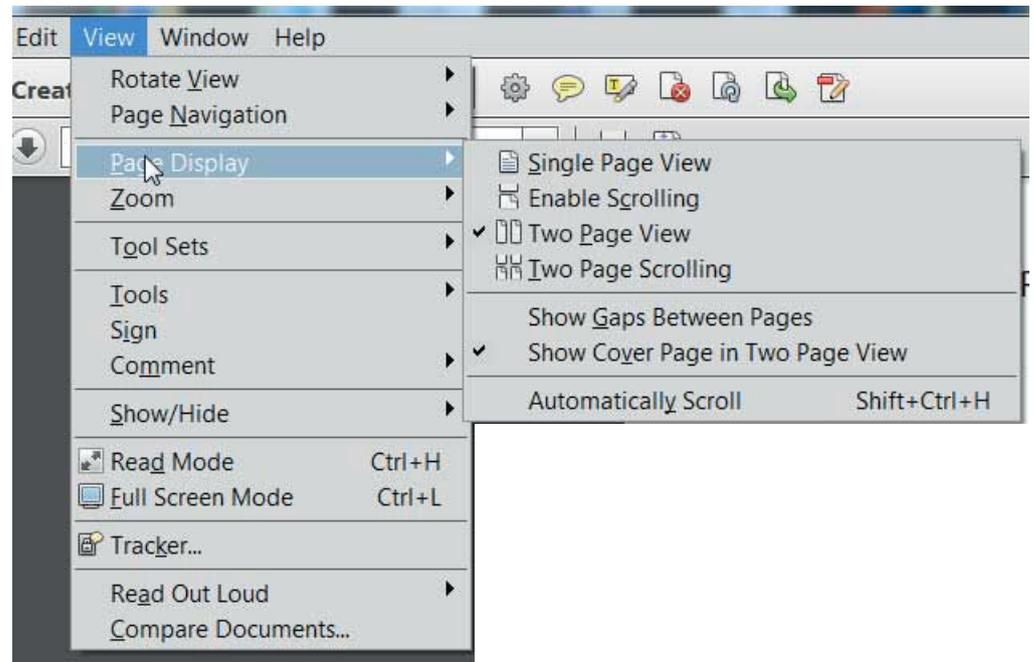

1. Referring to the input shaft module in the [Order code](#) on page 9, the input shaft option for this pump is identified by the code "G1". (H1P78L A A A2 C2 N F5 H G1H6 L 33 L 33 C P 28 NN C07 NNN).
2. Referring to the Service Parts List, find the shaft group. Next find the order code that relates to this unit, which is "G1". The shaft is found to be item J100 and part number 11112174.

## General information

### Adobe Acrobat 2-page viewing

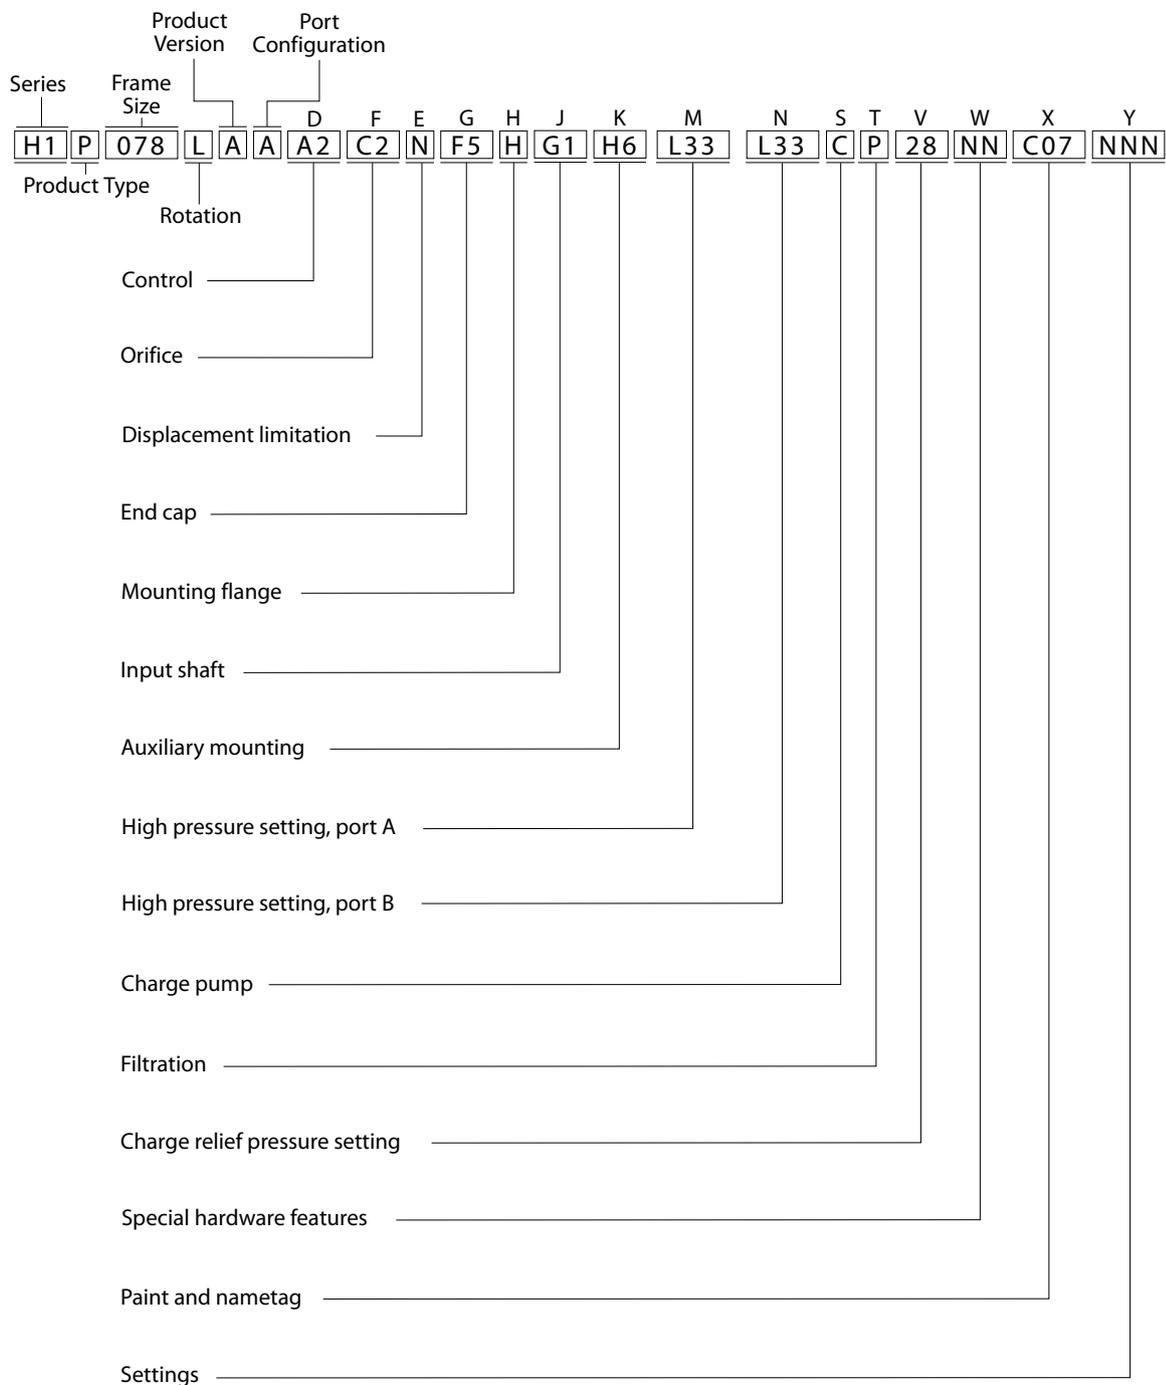

While viewing manual in Adobe Acrobat, the following settings need to be applied to ensure proper page display.

1. Select "View" → "Page Display" → "Two Page View"
2. Select "View" → "Page Display" → "Show Cover Page in Two Page View"

**General information**

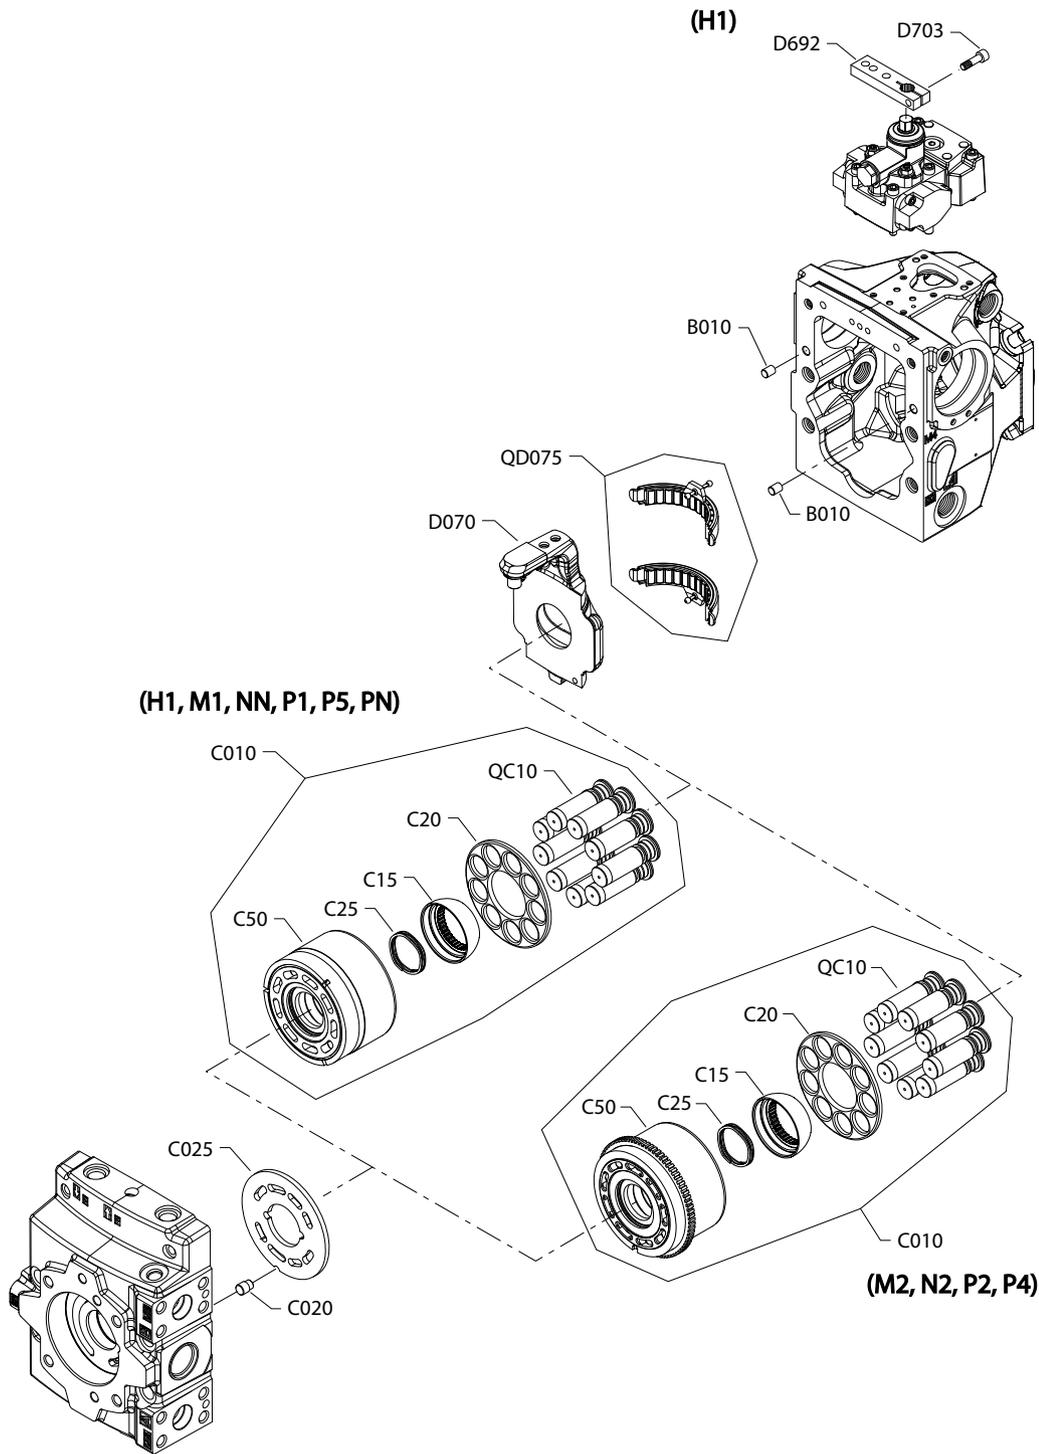

**Order code**

**Common parts and special hardware**

**H1P 69/78cc special hardware H1, M1, P1**

*Parts configuration*

Generic control and housing used to show part location only.

Option M5 is replaced with PN for pumps with EDC or FNR control, and replaced with option P1 for pumps with NFPE control.

## Common parts and special hardware

### Common parts

Item	Date Begin	Date End	Part Number	Part Name	Qty. per Model/Kit
B010	07-14		9004800-3708	Dowel pin	2

**⚠ Warning**

This control is for Fan Drive systems only. Use in other systems could result in unintended movement of machine or its elements. Loss of the input signal to this control will cause the pump to produce maximum flow. Contact Danfoss or an authorized distributor with questions regarding the use of this product.

H1 pumps

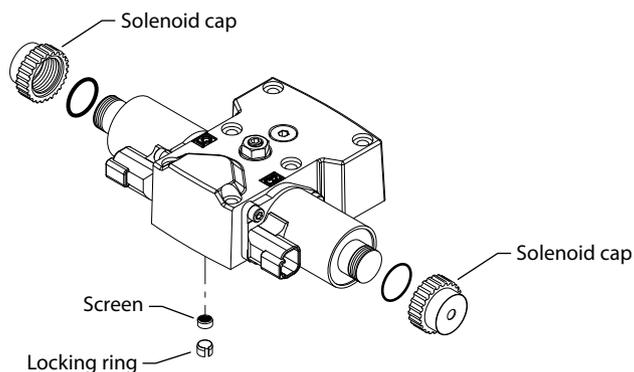

**Subject**

Control solenoid nut and screen locking ring

**Description**

As a product improvement, Danfoss changed the design of the EDC solenoids to avoid potential corrosion by changing the nut that holds the coil on the solenoid tube. The new nut has a closed cap design, which eliminates the potential of moisture to ingress past the solenoid tube threads. The new EDC and nut are functionally and physically interchangeable in all applications

A locking ring was also added to the controls. The locking ring will prevent the screen from falling out of the control during installation to the pump. The new locking ring can not be used in older style controls as the port is not drilled deep enough.

**Models affected**

#### Products affected

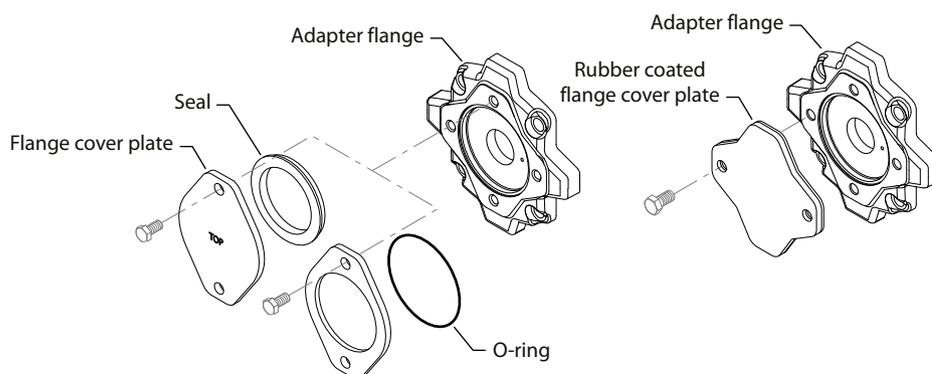

H1 pumps

#### Subject

Rubber coated auxiliary flange cover

#### Description

Danfoss has replaced the H1 pump auxiliary flange cover plate with a new rubber coated plate for all auxiliary flanges. The O-ring or donut style seal is no longer needed. The adapter flange interface to the auxiliary pump did not change, making this an interchangeable change. The new rubber coated cover plate can not be used as a running cover, if an auxiliary pump is not installed. The old cover and seal will need to be used for a running cover.

**Subject**

High pressure relief valve

**Description**

As a continuous improvement, Danfoss is changing the H1 high pressure relief valves used in 45 thru 100 cc pumps. The new valves will have a different weld process that locks the pressure setting. The new valves are completely interchangeable with the old valves. The part numbers for the valves are being changed to better track this change. The part number for the different settings will be incorporated into the system at different dates over the next 12 to 14 months. The old part numbers will become obsolete.

**Models affected**

All H1 45 thru 100 cc variable pumps.

**Serial numbers**

The part number for the different settings will be incorporated into the system at different dates over the next 12 to 14 months.

Change to the design of servo screen retention in pump housing

**Description**

Danfoss has made a change to the way the servo passage screens are retained in the pump housing of H1- 78 cc, 115/130 cc and 147/165 cc pumps. The screens in the past were retained only by friction fit. The screens are now pressed into the bores to the step. The retainers are then pressed in the bore against the screens with a maximum force of 3000 Newtons. The retainers must be against the screens so no movement of the screens occurs. A tool for installation of the retainer can be made with the dimensions shown below. The bores in the housing for the screens have been cut deeper to allow for the length of the retainers. The housings sold for service parts have changed to a housing assembly, with the screens and retainers installed. The old housings can be reworked to allow for the use of the new retainers by boring the 8mm bores for the screen and retainer 12mm deep from the gasket surface to the step that the screen sets on. The screen part number remains the same.

### SB-2012-015

#### Products affected

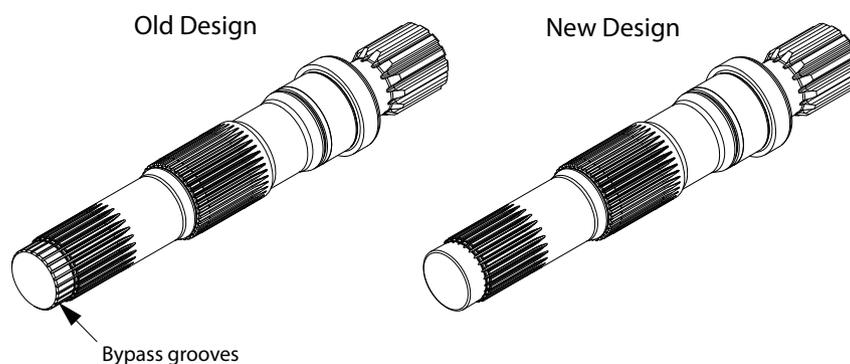

H1 78cc pumps

#### Subject

Shaft change

#### Description

Danfoss has removed the bypass on the end of the shaft on H1 78cc pumps. The old shaft allowed unfiltered oil from the pump case into charge pump and the high pressure loop. The bypass feature is now in the end cap. This change is not interchangeable with EPF end caps that have external remote filtration. The old design shafts are obsolete and no longer available.

**Subject**

Charge pump seal

**Description**

As a product improvement, Danfoss has changed the material on the sealing ring in the charge pump port plates of H1 pumps. The part number was changed for tracking purposes because the parts look similar. The old part numbers will become obsolete and no longer available as service parts.

**Models affected**

H1 pumps

Control override valve service kit change

**Description**

Service kits for Control Override Valves (CCO/COR) on H1 pumps have been reconfigured to include a new control option. There has been a connector change to the coil. The new connector is a DEUTSCH key-lock pin style ( W2SC). The old solenoid has a wire lead with a standard DEUTSCH connector (W2P).

Old style control (W2P connector)

New style control (W2SC connector)

Each new service kit comes with an adapter cable which has a W2P and a W2SC on each end.

Adapter Cable

New service kit numbers have been issued for the new control option. The old service kits are no longer available. Reference PUB HY2014-175.

Control options S6, E7 and E8 contain parts for the new style connector. The attached cable adaptor W2P / W2SC supplied in the service kit is necessary to replace the old control.

### Parts disposition

Non-interchangeable

**Service bulletins**

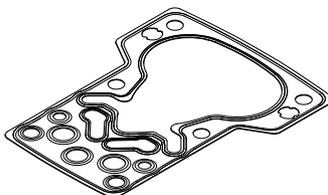

**SB-2016-033**

**Products affected** H1 pumps and tandems, MP1 and M46 control kits

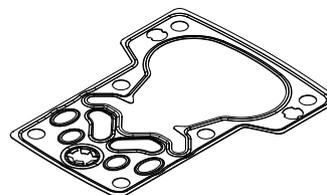

**Subject** Control Gasket

**Description** Danfoss Power Solutions has made a two-part design change to the control gasket used on H1 pumps and tandems and in MP1 and M46 control kits. The electrical displacement controls (EDC) have changed from an 8mm port to 12mm with tabs on the pressure port. The interim gasket used in the manual displacement controls has changed from a 10mm port to 12mm with tabs in the pressure port.

The gasket is now a common part to all pump models and control service kits. The new part can be substituted for the old part, but the old part cannot be substituted for the new part.

H1 69-78cc pumps

#### Subject

Shaft and cylinder block kit change

#### Description

Danfoss has made design changes to the main shaft and the slipper retainer ball guide in the H1 69/78cc pumps cylinder block kit. The internal block splines on the shaft are now machined longer and the slipper retainer ball guide is now splined.

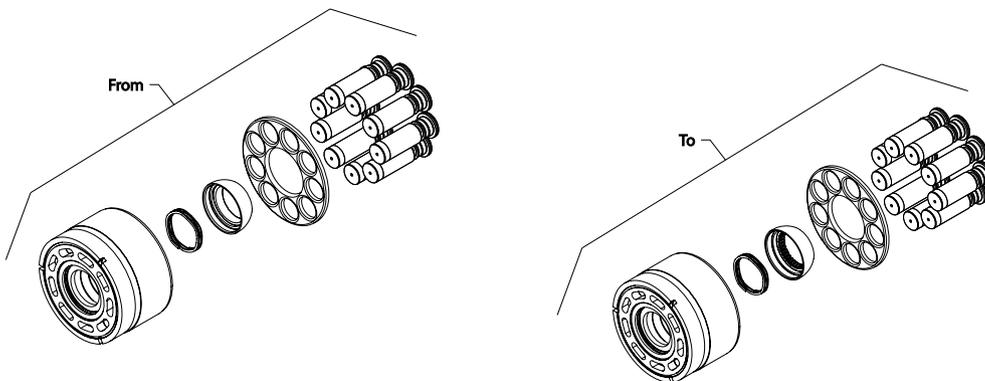

The new shaft may be substituted for the old shaft, but the old shaft cannot be substituted for the new shaft. The old shaft will be obsoleted.

The slipper retainer ball guide design is changed from non-splined to splined due to the new shaft spline design change. The new splined ball guide can be used only with the new shaft design and it is not interchangeable. The old slipper retainer ball guide will be obsoleted.

Swashplate feedback link

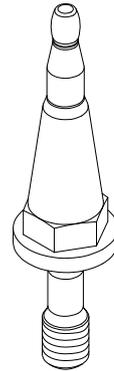

**Description**

Danfoss has made a design change to the swashplate feedback link on H1 pumps. To improve the compatibility of the controls that uses the angle sensor. The contact point on the feedback link, to the spring linkage on the angle sensor, has increased in width.

The new part can be substituted for the old part, but the old part cannot be substituted for the new. Old parts will be obsolete.

**Danfoss Power Solutions** is a global manufacturer and supplier of high-quality hydraulic and electric components. We specialize in providing state-of-the-art technology and solutions that excel in the harsh operating conditions of the mobile off-highway market as well as the marine sector. Building on our extensive applications expertise, we work closely with you to ensure exceptional performance for a broad range of applications. We help you and other customers around the world speed up system development, reduce costs and bring vehicles and vessels to market faster.

Danfoss Power Solutions – your strongest partner in mobile hydraulics and mobile electrification.

### Go to [www.danfoss.com](http://www.danfoss.com) for further product information.

We offer you expert worldwide support for ensuring the best possible solutions for outstanding performance. And with an extensive network of Global Service Partners, we also provide you with comprehensive global service for all of our components.
